

PETER KANJA CHILESHE

Software Developer

Cell: +260972718659 | Email Address: peterkanjachileshe@gmail.com

PROFESSIONAL SUMMARY

Peter kanja Chileshe is a results-driven Software Engineer with three years of experience in software development. Specializing in creating and optimizing robust web software solutions, I excel in interpreting system requirements to deliver effective applications. I have contributed to the success of diverse systems, including Stanbic Smart pay, Zanaco Smart-pay, ZICB Smarty-pay, Nhima, One Zambia Lotto, Chain Supply, Lesotho Revenue, Atlasmara Smart-pay , First Alliance Smartpay, Indo Bank Smart-pay, UBA Smart-pay, Data bank Zicta, Nation Road Transport Agency and Zambia Railways management systems, regulatory systems. My skills extend to UI design and development, ensuring seamless data integration and retrieval. Beyond technical capabilities, I provide comprehensive client support, conduct user acceptance testing, and offer troubleshooting during production phases. I bring a multilingual proficiency that allows me to adapt to various project requirements. Known for innovative problem-solving and adaptability, I thrive in fast-paced environments. Committed to continuous learning, I stay abreast of industry trends and emerging technologies. Eager to bring my technical expertise, commitment to excellence, and passion for innovation to a dynamic team focused on delivering cutting-edge solutions in the ever-evolving landscape of software development.

KEY COMPETENCIES:

-
1. **Software Development:** Skilled in creating and designing software that works well and meets client needs and capable of understanding and translating client requirements into functional software solutions.
 2. **Web Based Development:** Competent in making web-based systems using languages like elixir with phoenix framework for tailwind, bootstrap and jQuery for the frontend. In my three years of work experience, I have been using the said languages for both backend and frontend
 3. **Database Management:** Competent in organizing and managing data in a way that helps the software run smoothly.
 4. **Client Support and Training:** Can assist clients throughout the process of making and using the software, including testing and helping them learn how to use it. I have done this during the user accepting testing for the Zambia railways management systems and many other systems. Preparing of test script for systems worked on so that clients can validate they system based on the provided requirements.

-
5. **Programming tools:** Competent in various programming languages like elixir with phoenix framework, React.js which I have been using in my professional work, JavaScript and jQuery. Basic Knowledgeable with t languages like C++ . I have worked with project management tools like Trello and version control systems like git on projects where we were many and required to keep track of how work is progressing.
 6. **Project Diversity:** Worked on various types of projects, such as systems for managing Nhima, Stanbic bank Smartpay and railway operations and a number of fintech systems like the prudential regulatory system. Having a diversified mindset and approach in the field of software development is very important and cardinal in my personal development.
 7. **Innovation and Problem-Solving:** Good at finding creative solutions to problems and adapting to changes quickly.
 8. **Continuous Learning:** Always learning about new things in the field to stay updated and improve skills over time.
